a terminal communicating data with the server;

a communications network connecting said server to said terminal;

a temporary line disconnection unit, provided in the server and the terminal, monitoring a content of received data from the server and from the terminal, when a specified data is received disconnecting a line being used for data communications without issuing any disconnection notifications to an upper layer application of said terminal and said server when said terminal voice communicates with a third party other than said server through said communications network during the data communications with said server, and automatically connecting said server to said terminal when the voice communications terminate;

an automatic data fetch unit automatically fetching data of web sites including information which a user may require from said server to said terminal; and

a storage unit storing the data fetched by said automatic data fetch unit,

wherein a data communicating process is performed from a status at a point immediately before starting the voice communications when said server and said terminal resume the data communications, and

2

wherein said automatic data fetch unit preliminarily fetches the data obtainable from said server and stores the data in said storage unit during the data communications, and accesses said storage unit during the voice communications so that the data in said storage unit is displayed during the voice communication, thereby realizing virtual data communications during the voice communications.

9.   (Four times amended)   A communications method comprising the steps of:

(a)   connecting a line from a server to a terminal for providing information for data communications with the server through a communications network;

(b)   monitoring a content of received data from the server and from the terminal, when a specified data is received disconnecting a line being used for data communications without issuing any disconnection notifications to an upper layer application of said terminal and said server when said terminal voice communicates with a third party other than said server through said communications network during the data communications with said server, and automatically
